

Upgrade & Future-Proof Your Infrastructure with Scale Computing

Discover a Robust Virtualization Alternative with Effortless Management and Top-Notch Support

Intuitive interface, seamless replication, and top-notch support make Scale Computing Platform (SC//Platform) the ideal choice for simplifying your virtualized environment while ensuring future readiness.

FUTURE-PROOF YOUR INFRASTRUCTURE!

Likelihood to Recommend

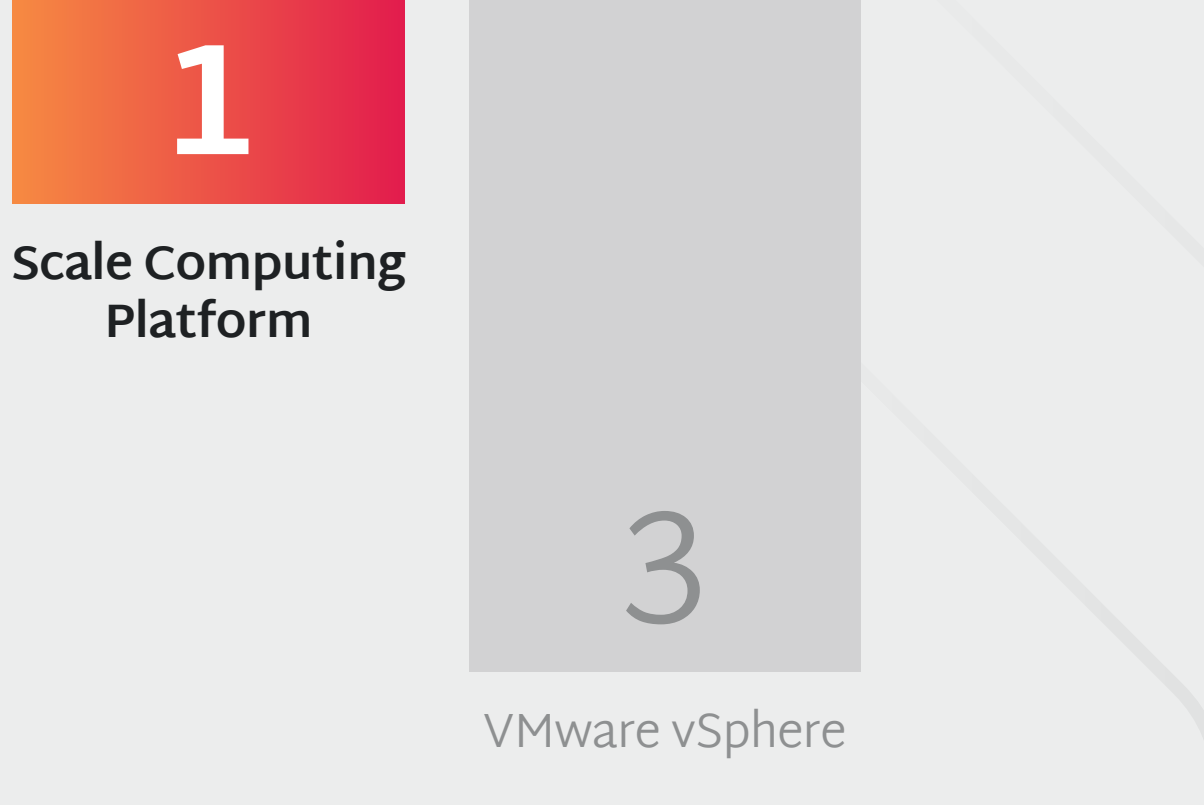

“Great Alternate for VMware”

Very Easy to spin up a VM in Scale. Snapshotting and replication to other Clusters is very easy. Clone the VM to do testing in minutes. Support is the best.

Average Go Live Time (months)

“Robust, yet easy to use”

Setting up new servers is a breeze. Replication to other clusters was also simple to set up. The learning curve is not huge with Scale, and the support is top-notch. Glad we made the move!

Resource Saving

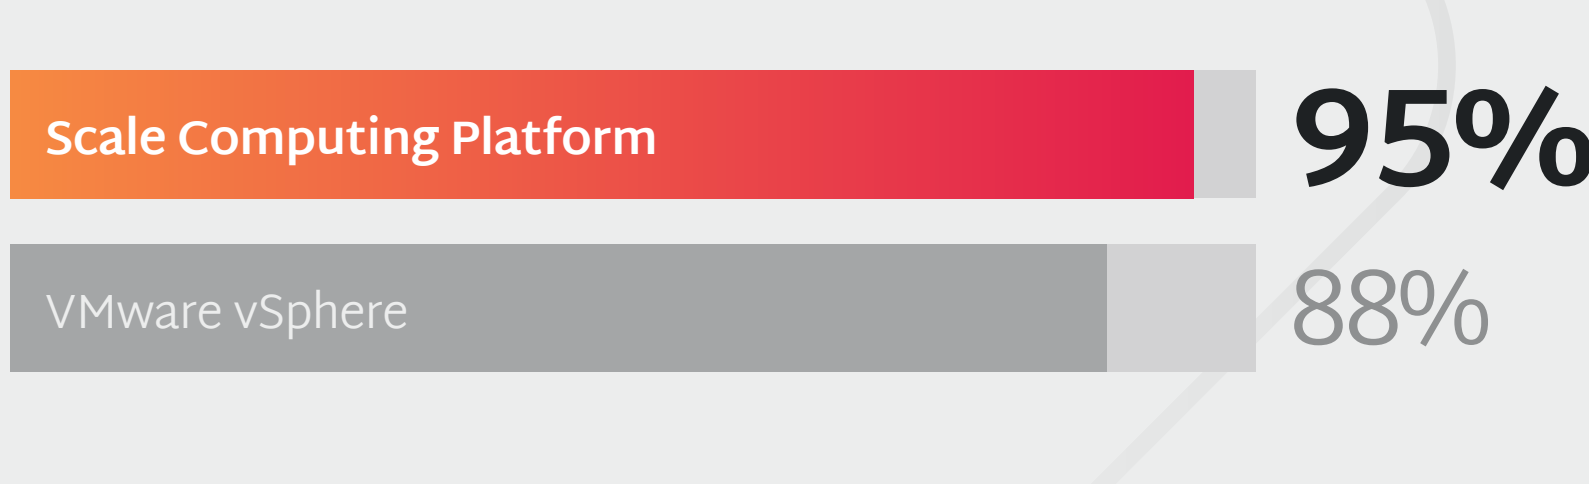

“Hyperconverged Bliss”

Since moving from VMware to Scale Computing I feel like I'm in a dream. Scale Computing offers a hyper-converged system making life 10 times easier than alternative products. I recommend Scale to anybody looking to enhance their virtual environment and make managing it even easier.

Quality of Support

“Almost a Decade of Dependability: My Long-Term Experience with Scale Computing”

My nearly 10-year journey with Scale Computing has been marked by a consistently dependable and evolving platform. For businesses seeking a solution that combines simplicity with scalability and reliability, Scale Computing remains a steadfast choice that has stood the test of time.

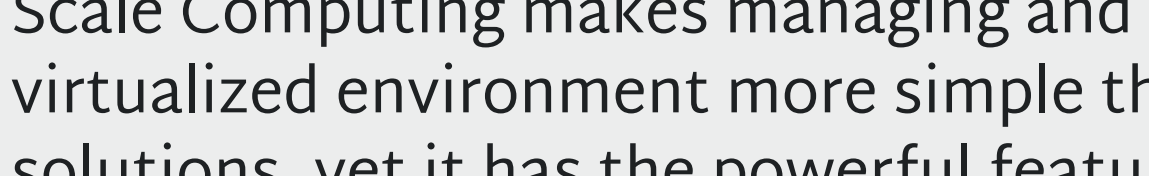

Ease of Setup

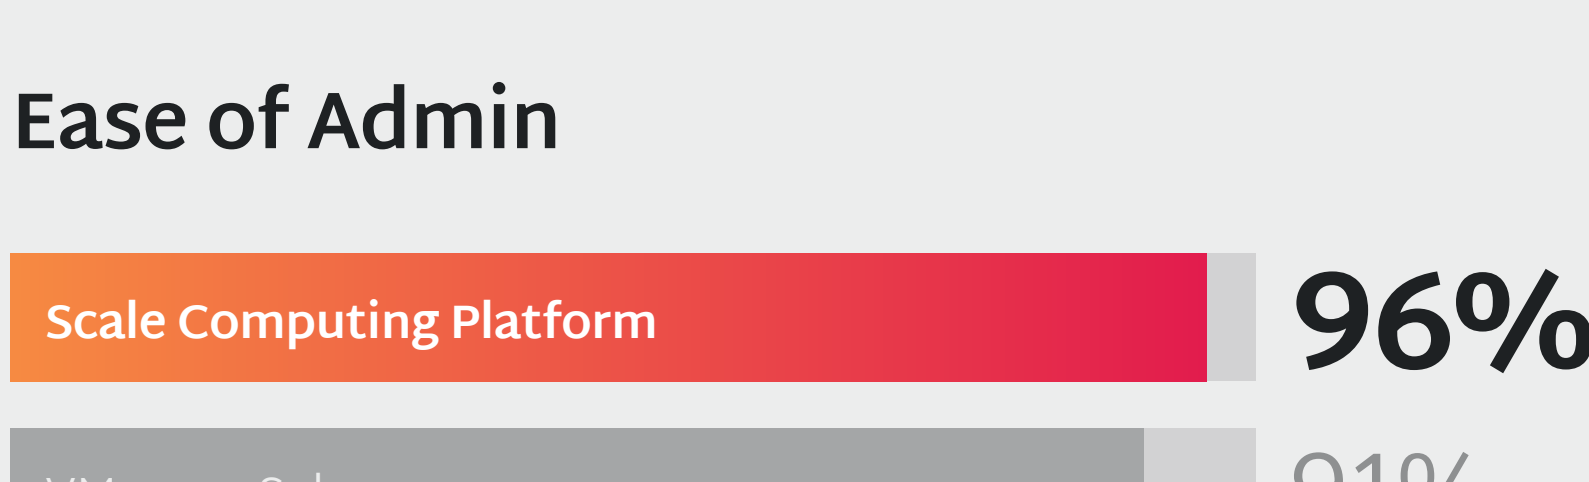

“Scale Computing makes virtualization easy for IT”

Scale Computing makes managing and operating a virtualized environment more simple than other solutions, yet it has the powerful features that are needed. Snapshots, Replication, and modifying VMs are intuitive and work well. Whenever we do have a question or possible issue, support is very responsive and knowledgeable.

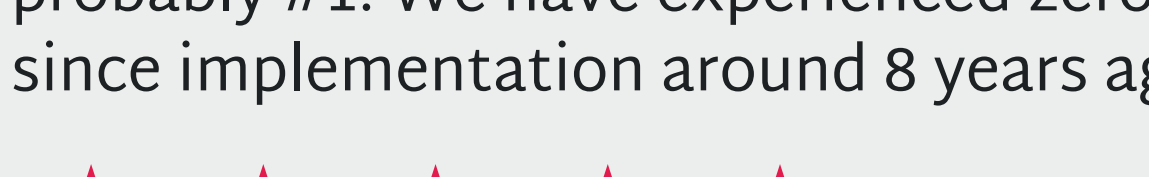

Ease of Admin

“Best decision ever!”

There are many things that I like best about the Scale Computing Platform, but high availability is probably #1. We have experienced zero downtime since implementation around 8 years ago.

FUTURE-PROOF YOUR INFRASTRUCTURE!
